

Overview of Kentucky's Early Childhood Professional Development Framework

Kentucky Invests in **D**eveloping **S**uccess

August 2008

THE KENTUCKY EARLY CHILDHOOD PROFESSIONAL DEVELOPMENT FRAMEWORK

August 2008

The Kentucky Early Childhood (EC) Professional Development (PD) Framework Plan (Townley & Newberry, 2002; revised 2003) as approved by the Early Childhood Development Authority. Copies of the approved plan are available at www.kidsnow.ky.gov.

Proposed revisions to the Kentucky EC PD Framework were submitted to and approved by the Early Childhood Development Authority in April 2008.

This document was developed through the Kentucky Partnership for Early Childhood Services at the University of Kentucky in collaboration with the Division of Child Care, Department of Public Health and Kentucky Department of Education, Division of Early Childhood Development. Some information included in the document was adapted from the Kentucky Early Childhood (EC) Professional Development (PD) Framework Plan (Townley & Newberry, 2002).

The writing and editorial team included:

Beth Rous, Kentucky Partnership for Early Childhood Services, University of Kentucky

Mary Howard, Division of Early Childhood Development, Kentucky Department of Education

Lee Chance, Michelle DeJohn, & Darlene Hoover, Division for Child Care, Cabinet for Health and Family Services

INTRODUCTION

In 2002, Kentucky launched a plan for the development of a statewide Professional Development Framework (Townley & Newberry, 2002) that included key components to address the needs for education, training and credentialing of early care, intervention and education professionals in Kentucky. This plan represented months of work with input from numerous stakeholders across the state. Specific information about the planning and approval process for the PD Framework, including the numerous contributors, is available in the documents *Early Childhood Professional Development: Creating a Framework for Kentucky*, 2002, 2003, and *Kentucky Early Childhood Professional Development Framework: Recommendations for Expansion to Include Technical Assistance Services*, 2008 (www.kidsnow.ky.gov).

This document provides an overview of the Kentucky Early Childhood Professional Development (PD) Framework that includes existing programs and supports, as well as the components of the PD Framework plan that have been implemented across the state. All elements of the PD Framework have been endorsed by the Kentucky Early Childhood Development Authority. The EC Development Authority is a legislative established public agency and political subdivision of the Commonwealth of Kentucky and is charged with making recommendations to the Governor about expenditures from the Early Childhood Development Fund in support of the KIDS NOW Initiative.

What is Professional Development?

For Kentucky, professional development includes structured teaching and learning experiences to support the acquisition of knowledge and skills and the implementation of knowledge and skills in the work environment. Professional development is an ongoing process of continuous improvement that increases job related knowledge and skills, and is intentional and purposeful to support specific outcomes related to practice.

The overall purpose of professional development is to support the professional growth and development of those working with young children and families. Therefore, this definition of professional development recognizes three distinct but integrated components: 1) structured educational experiences, 2) structured technical assistance and support, and 3) self-guided learning.

Defining and delineating the critical components of professional development is the first step in helping the early care, intervention and education system identify key outcomes to be achieved. High quality professional development experiences should be designed to lead to:

- ◆ all early care, intervention, and education staff being competent, confident, highly qualified and able to implement practices consistently and with a high degree of fidelity;

Figure 1. Critical Components of Professional Development

- ◆ consistency in the use of high quality practices and programming across the state;
- ◆ continuous quality improvement, with staff who are able to manage change and effectively use available resources;
- ◆ high quality services to children and families; and
- ◆ measurable improvements in outcomes for children.

To help reach these outcomes, it is important that opportunities exist for all staff to access professional development, including ancillary staff who may work with children and families (e.g., teacher assistant or aide/paraprofessional, bus/van drivers, kitchen staff, therapists, directors, family service workers). It also is important to ensure that those providing professional development opportunities use a wide variety of strategies and techniques that match the learner's needs.

As a way to help achieve these outcomes, the Kentucky Early Childhood Professional Development Framework defines five levels of professional accomplishment and the training, technical assistance, credentialing and articulation requirements to support each level. The framework includes:

- ◆ Early Childhood Core Content that describes what early childhood professionals should know and be able to do.
- ◆ Credentials and Degrees for early care, intervention and education professionals.
- ◆ A seamless training track to support professionals in building knowledge and competence from level to level.
- ◆ The provision of support services or technical assistance to help staff implement and sustain skills and practices in the work environment.
- ◆ Articulation agreements that support the transfer of credit across education and training.
- ◆ A scholarship program at the college and non-college level for early childhood professionals.
- ◆ A Professional Development Registry that supports the documentation of credentials, scholarships and awards.
- ◆ Training Registries to support documentation of training across programs and providers.

Each of the components of the Kentucky Early Childhood Professional Development Framework is presented and described in the following sections of this document.

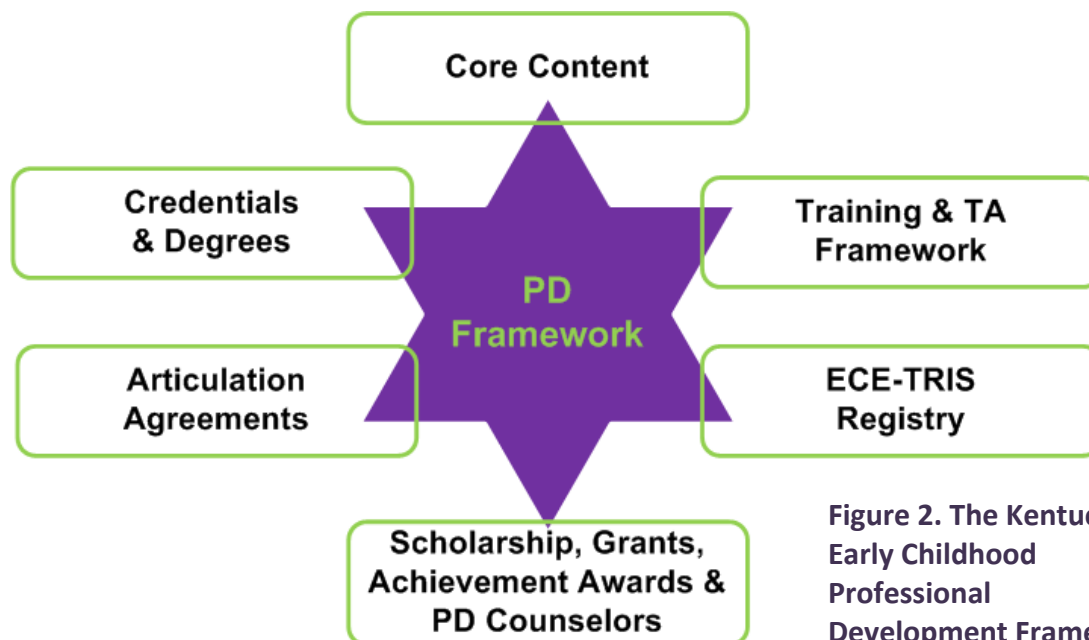

Figure 2. The Kentucky Early Childhood Professional Development Framework

EARLY CHILDHOOD CORE CONTENT

The Kentucky Early Childhood (EC) Core Content is defined as the specific knowledge, competencies, and characteristics needed by early childhood practitioners to work effectively with young children and families. EC Core Content is the foundation for determining training content, course content, and competency standards for professional performance. The EC Core Content was developed using existing professional resources that put forth standards (i.e., Kentucky Interdisciplinary Early Childhood Education programs, Child Development Associate functional area competency standards, Head Start, Family Child Care, American Public Health, National Association for the Education of Young Children and the Division for Early Childhood of the Council for Exceptional Children). The EC Core Content is provided in Appendix A and is also available for free download at www.kidsnow.ky.gov.

The EC Core Content is intended to be comprehensive and descriptive, but also fluid and flexible to allow for needed changes over time. To that end the EC Core Content:

- ◆ Allows for multiple pathways for entering early childhood education and for exiting at various terminal points.
- ◆ Includes a mechanism for linking various early childhood education and training programs.
- ◆ Provides for continuous progress and professional development.

The EC Core Content covers seven essential competency subject areas of early childhood education and each area is organized into five levels of increasing mastery. Individuals planning early childhood education and training programs can use the EC Core Content to correlate program content with the expected skill levels and desired competency outcomes of the participants.

LEVELS OF EC CORE CONTENT

Professionals in the field of early care, intervention and education become increasingly competent through their experiences and professional growth opportunities. This competence crosses a variety of content areas and many levels of skill. The competencies that are the focus of this document are organized from basic to high-level skills across five levels. Each level is a prerequisite to the next, thus the competencies build on one another. All competencies are referenced within the early childhood literature and most have been cited from similar documents from other states.

The levels of competencies are not awards or a certificate, but may correlate with existing certificates or awards. Each level assumes greater knowledge and skill than previous levels; however, an individual level should not be seen as limited to a particular job or position of employment.

Table 1. Early Childhood Core Content Level Descriptions

LEVEL I	Knowledge & skills across all seven content areas for professionals at the initial level, which includes entry into the field & a Commonwealth Child Care Credential.
LEVEL II	Knowledge & skills across all seven content areas for professionals with a Child Development Associate Credential.
LEVEL III	Knowledge & skills across all content areas for professionals from CDA to Associate degree.
LEVEL IV	Knowledge & skills across all content areas for professionals with a Bachelor degree
LEVEL V	Knowledge & skills across all content areas for professionals above a Bachelor degree

Level I. Early childhood practitioners with a high school diploma or GED must demonstrate social skills such as courtesy, respect, and the appreciation for diverse ethnicities, cultures, ideas, and viewpoints. They must also demonstrate literacy skills that enable them to expressively read books appropriate for young children through age five; use acceptable grammar to communicate with children, staff, and parents; and, legibly write notes on children's developmental skills. They must also:

- ◆ be able to verbalize their awareness of physical and biological processes in the natural environment;
- ◆ display attitudes of wondering, investigation, and respect for the ecology of the natural world and enjoy partnering with children in experiencing all five senses and searching for more information;
- ◆ demonstrate that they have the basic mathematical and spatial knowledge to solve practical problems while working with children and other adults;
- ◆ demonstrate fundamental, coordinated small and large muscle skills in physical movements and games; and
- ◆ demonstrate a practical understanding of the principles of democracy, justice, and fair play by using techniques of positive guidance, conflict management, and peacemaking for children, other staff, and the community.

Level II & III. At this level, practitioners may become lead teachers or administrators. They must:

- ◆ demonstrate increased abilities to reason, think critically and reflectively, discern relationships between areas of knowledge, and analyze the nature of physical and social problems;
- ◆ show evidence of basic computer literacy and internet search skills;
- ◆ possess literacy, speaking, interpersonal, and leadership skills sufficient to effectively conduct parent meetings, relate to a board of directors, write descriptive newsletters, and construct detailed curriculum plans that include individual children's developmental goals; and,
- ◆ master the grammatical and conversational rudiments of one other language, which assists early childhood educators in becoming aware of the rich cultures and languages of the children and families enrolled in their programs. Spanish is especially recommended because of the need to communicate effectively with Kentucky's rapidly increasing Hispanic populations.

Levels IV & V. At these levels, practitioners may increase their general knowledge through required and elective courses according to their interests and needs. In addition to exploring human development theories, anthropology, sociology, statistics, and consumer issues, they may select advanced studies in foreign languages, computer technology, psychology, philosophy, history, and the arts and sciences. Increased experience and leadership in the early childhood field may lead to higher levels of competence in reasoning, critical and reflective thinking, mathematics, and the physical or biological sciences.

SUBJECT AREAS COVERED

The degree to which early childhood professionals are expected to master these subject areas depends on their level of competence. Specific EC Core Content requirements for the first level, for instance, require describing and demonstrating basic knowledge of the subject area; succeeding levels require more complex knowledge and the ability to plan and implement programs or procedures; and the highest levels require evaluation of early childhood practices.

Child Growth and Development. Experiences for any child, regardless of age, must be planned around the child's developmental abilities. Development has several interrelated areas; each influences the others and all develop simultaneously. It is essential for early childhood educators to recognize that development proceeds in predictable steps and learning occurs in recognized sequences. At the same

time, they must consider individual, age-level, and cultural/ethnic characteristics when assessing children's rates and styles of development.

Health, Safety, and Nutrition. These are basic needs of all human beings, and early childhood environments must ensure them. Programs must adhere to relevant laws and regulations; furthermore, they must consider the health, growth, and developmental requirements for each child within the context of cultural and developmental diversity and any special needs.

Professional Development/Professionalism. Adults providing early care, intervention and education must take advantage of opportunities to grow professionally, follow ethical standards of behavior and demonstrate knowledge of and involvement in advocacy for early childhood learning environments.

Learning Environments and Curriculum. Developmentally appropriate environments and curricula have a positive impact on a child's emotional, physical, cognitive, communicative, creative, and social care. Adults who provide early care, intervention and education must know how to offer an organized, inviting accessible and interactive environment that has many diverse and appropriate materials, activities, and experiences. Adults support staff-to-staff communication, team work, and staff-family communication.

Child Assessment. Ongoing assessment helps early childhood educators evaluate all areas of a child's growth and development. Educators must be able to observe, assess, interpret, and document children's skills and behavior, systematically report on them to appropriate staff and family members, and use the information gathered to plan developmentally appropriate experiences and activities.

Family and Community Partnerships. Understanding the roles that family members and others play in children's lives is vital for early childhood interventionists and educators. They must be able to integrate the following concepts:

- ◆ Children develop within the context of their families, which may take many forms. Families are the primary influence on children's development and have primary responsibility for child rearing. In turn, each child has influence on the members of his or her family and on the family as a system.
- ◆ A responsive early education environment respects and celebrates the diversity of values, customs, and traditions in the family of each child. It nurtures the primary relationships between children and those who parent them. It also offers a variety of meaningful opportunities to families to participate in early childhood programs.
- ◆ Early childhood professionals help connect children and their families with community resources. This can be accomplished through curriculum, interpersonal relationships, and knowledgeable referrals.

Program Management and Evaluation. Adults providing early care, intervention and education must use all available resources for a quality program. They must also be effective communicators, planners, record-keepers, and evaluators. Evaluation of the program should include input from staff, families, and the community.

CREDENTIALS, DEGREES AND CERTIFICATION

Kentucky's Early Childhood PD Framework provides multiple opportunities to acquire increasing levels of professional credentials. Each credential represents a discrete entry/exit point, and each credential represents a building block to the next level of credentialing and competency.

In addition to the national Child Development Associate (CDA), three specific early childhood credentials are available in Kentucky. The credentials were created to acknowledge that differing competencies and skill areas are required for different aspects of the early childhood profession. Credential programs are offered in several kinds of education settings to recognize that different types of early childhood practitioners may wish to access education and training settings appropriate to their needs. Lead agencies/institutions are described in the context of each credential. The three early childhood credentials are:

- ◆ Commonwealth Child Care Credential
- ◆ Director's Credential
- ◆ Early Care and Education Trainer's Credential

Table 2. Credentials At-A-Glance

Credentials	Requirements	Content	Ongoing
Commonwealth Child Care Credential	60 clock hours of instruction, including field assignments	14 hours in child growth & development; 15 in learning environments/curriculum; 9 in health, safety & nutrition; 7 in family and community partnerships; 4 in child assessments; 6 in professional development; 5 in program management/evaluation	15 hours of additional training each year
Director's Credential	12 college credit hours is distributed in required areas.	Regulations & laws; ethics; programming, supervision & staff development; health, safety & nutrition; financial management & marketing; community collaboration/resource management	15 hours of additional training each year
Trainer's Credential (must be 21 years old)	Meet educational requirements by level, participate in orientation & seminar	A credential or degree in early childhood or related field; training in adult learning theory and training design, and knowledge of early care, intervention and education resources and services in Kentucky.	Annual trainer updates & 45 hours of additional training every 3 years

COMMONWEALTH CHILD CARE CREDENTIAL

The Commonwealth Child Care Credential (CCCC) provides additional training to practitioners wishing to exceed the minimum training hours required by Child Care Licensing Regulations. The CCCC is a planned program of education and training based on the Core Competencies described in this report. The hours of instruction (60) are intended to fulfill half of the time requirements and skill mastery level necessary for the Child Development Associate Credential.

The Commonwealth Child Care Credential is awarded by the Division of Child Care. The credential is based on a common set of core competencies presented in the EC Core Content and aligns with the first

60 hours of the Child Development Associate (CDA) Credential. The chief requirement for the credential is 60 hours of instruction, including field assignments, to be completed within one year. This can articulate to (or be considered equal to) a 3-credit-hour college course. The 60 hours of instruction includes areas as presented in the Credentials-At-A-Glance Figure above.

Candidates for the credential may complete a CCCC/CDA non-college scholarship application and upon being approved are admitted to an approved Commonwealth Child Care Credential program. The scholarship is funded through KIDS NOW Scholarship (as funds are available).

Before the training is completed, the trainer conducts an exit assessment of the trainee using the nationally recognized Child Development Associate observation tool. After the assessment, the trainee and training organization write an action plan to promote the trainee's continued growth.

Those who have earned a Commonwealth Child Care Credential must obtain 15 clock hours of training each year to stay current in the field and to maintain the credential. Training for the Commonwealth Child Care Credential is conducted by agencies approved by the Division of Child Care. A list of approved training organizations can be found at <http://chfs.ky.gov/dccs/dcc/>.

DIRECTOR'S CREDENTIAL

The Director's Credential is intended to provide education and development in the skill areas needed to manage an early childhood program. The program may be a discrete course of study or may build on the candidate's existing experience and proficiency through portfolio development or individualized assessment. Candidates work through the higher education institution of their choice for information related to the specific program of study for the Director's Credential.

Candidates who meet eligibility guidelines for the Early Childhood Scholarship Program may use this program as a resource for financial assistance with coursework leading to the award of a Director's Credential. The Director's Credential is awarded by the Division of Child Care upon successful completion of the requirements and upon recommendation by an approved higher-education institution.

Requirements include 12 college credit hours in early childhood education and related administrative subjects. These hours can be earned as part of a degree program in early childhood education or individuals may enroll specifically for Director's Credential course work. Course work may be offered by approved state technical or community colleges, or at universities or colleges offering Interdisciplinary Early Childhood Education (IECE) programs.

Major areas of core knowledge and competencies for the Director's Credential include regulations and laws; ethics; programming for families and children; supervision and staff development; health and safety; financial management and marketing; and, community collaboration/resource management.

Regulations and laws. This includes knowledge of the local, state and national laws and regulations that govern licensed child care providers (e.g., food service, the Americans with Disabilities Act). It also includes the ability to obtain information about the intent of those laws and regulations, as well as changes to them, from sources such as government agency web sites.

Ethics. This includes knowledge of ethical issues related to the financial operation of a center as well as dealings with children, families, and staff (e.g., confidentiality, compensation, the code of ethics for the National Association for the Education of Young Children). It also includes an understanding of individual rights and diverse backgrounds and how they affect relationships – so directors can handle daily challenges appropriately and without discrimination.

Programming for families and children. This includes a knowledge of theoretical, foundational, philosophical and historical perspectives in early childhood programming (such as developmentally appropriate practice, the primary caregiver system, constructivism, behaviorism, early intervention, Montessori, High Scope, Reggio, the activity-based approach); the ability to develop and implement appropriate action plans (such as inclusion plans, individual family service plans, and individual education plans) to meet the individual needs of children; awareness of assessment tools for both children's development and programming; and understanding the effect of culture and environment on adults' beliefs regarding discipline and guidance as well as children's development and self-concept.

Supervision and staff development. This includes an understanding of managerial styles (such as authoritative, democratic, collegial) and personality in terms of motivating staff members for professional growth; the ability to supervise staff through planned programs; and, the ability to communicate effectively both verbally and in print and to truly listen.

Health and safety. This includes knowledge of local, state and national laws and regulations that provide for the mental and physical health of children, families, and staff; knowledge of how to implement those laws and regulations; awareness of the nutritional needs of children and food preparation procedures; and, the ability to find information about health and safety in order to provide resources to staff and families.

Financial management and marketing. This includes the comprehension of financial concepts and the ability to use financial tools to make a center financially viable or to expand the center; the ability to maintain accurate and complete financial reports and to project income; awareness of the local marketplace and how to assess supply and demand in the area to attract families, staff and financial supporters to the center; and, the ability to understand the role of the center in relation to the larger community in order to define and promote the center's image.

Community collaboration/resource management. This includes knowledge of resources in the community for young children and their families which go beyond early care, intervention and education; an understanding of how to help children and families gain access to these resources; and an understanding of how to collaborate with other groups and individuals to increase community resources.

TRAINER'S CREDENTIAL

The Kentucky Early Care and Education Trainer's Credential includes the competencies and standards for those who provide training to early childhood practitioners. The level of education, training, and experience of the trainer is correlated with the content levels at which training may be offered. At the more complex content and expected competency levels of the trainees, the qualifications for the trainer become more stringent.

Individuals who participate in training have a way to identify the level of content at which training will be delivered so as to key the selection of training to their individual needs and skill levels. Trainers have a way to individualize training content to meet specific skill levels of the trainees and competency areas of EC Core Content.

There are specific steps necessary to acquire a Trainer's Credential, including information related to levels of training and trainer qualifications that are necessary to maintain a multi-level training system. Specialty trainers who are highly qualified in a specific area related to children and families must meet defined credential requirements.

In general, all trainers must be at least 21 years old, meet the educational requirements and have experience relevant to the following areas: child growth and development; learning environments and curriculum; health, safety and nutrition; family and community partnerships; child assessment; professional development/professionalism; and, program management/evaluation. They must also:

- ◆ participate in “The Introduction to Resources in Kentucky for Early Care and Education Trainer’s” (2 hours)
- ◆ complete a seminar in “Fundamentals of Effective Training” (15 hours)

The introduction and seminar are supported in part through KIDS NOW funds. The Trainer’s Credential is awarded by the Division of Child Care upon successful completion of the requirements and presentation of documentation.

Table 3. Trainer Levels

LEVELS	EDUCATION & EXPERIENCE	REQUIREMENTS ¹ :	PERMITTED TRAINING LEVELS	RENEWAL PERIOD
1	H.S. Diploma or equivalent At least 3 years related exp in field of early childhood	Complete Intro to Resources	Co-train single topic with credentialed trainer at higher training level	- Valid for three years - Non-renewable
2	At least a CDA with 3 years FT* experience in field of early childhood <u>OR</u> 10 years FT*related experience in relevant EC Core Content, including formal early childhood training equaling 45 clock hrs; or 4.5 C.E.U.s; or 3 college credit hours	Complete Intro to Resources Complete Fundamentals of Effective Training	Training hours as required by the Division of Regulated Child Care Commonwealth Child Care Credential training or initial 60 hours of CDA training through approved training organization Co-train higher (60-120 hours) CDA level with a level 4 & 5 Trainer through a approved training organizations Co-train 12 hours with a Level 4 or Level 5 trainer before training solo	Renewable every 3 years by application, including documentation of: Training in EC field equaling 45 clock hours 15 hours adult learning theory & 30 hours in early childhood, 4.5 C.E.U.s or 3 hours college credit from date of credential Remain updated on state & national early childhood issues. State updates available at websites
3	Associate degree in early childhood or the equivalent of 30 credit hours in early childhood coursework & 3 years FT* related experience in early childhood field <u>OR</u> At least a Bachelor’s degree other than early childhood, & At least 1 year FT* related experience in EC field <u>OR For Healthy Start Consultants only</u> -Associate level degree in nursing,	Complete Intro to Resources Complete Fundamentals of Effective Training	Training hours as required by the Licensed Child Care Levels 1,2,& 3 on Rubric for Levels of Training/Professional Development Commonwealth Child Care Credential or CDA instruction, through an approved training contractor Train Levels 1,2,& 3 on the Rubric for Levels of Training/Professional Development, through an	Renewable every 3 years by application, including documentation of: Training in EC field equaling 45 clock hours 15 hours adult learning theory & 30 hours in early childhood, 4.5 C.E.U.s or 3 hours college credit from date of credential Remain updated on state & national early childhood issues. State updates available at websites

¹ All applicants must be at least 21 years of age.

LEVELS	EDUCATION & EXPERIENCE	REQUIREMENTS ¹ :	PERMITTED TRAINING LEVELS	RENEWAL PERIOD
	dietetics or other approved/related fields		approved training organization	
4	At least a Bachelor's degree in early childhood, & 1 year FT* related experience in early childhood field <u>OR</u> At least a Bachelor's degree other than early childhood, <u>AND</u> At least 1 year FT* related experience in EC field, including the equivalent of 3 credit hours in child development <u>OR For Healthy Start Consultants only</u> - Bachelor degree in nursing, dietetics or other approved/related fields	Complete Intro to Resources Complete Fundamentals of Effective Training (OR submit documentation of equivalent training)	Training hours as required by the Division of Regulated Child Care, Levels 1,2,3,4 Train Levels 1,2,3 & 4 tracks on Rubric for Levels of Training/Professional Development, through an approved training organization	Renewable every 3 years by application, including documentation of: On-going training in EC field equaling 45 clock hours 15 hours adult learning theory & 30 hours in early childhood, 4.5 (3) C.E.U.s or 3 hours college credit from date of credential Remain updated on state & national early childhood issues. State updates available at websites
5	At least a Masters degree in early childhood & 1 year FT* related experience in early childhood field <u>OR</u> At least a Masters degree in a field related to early childhood (non related not considered) & 3 credit hours in child development, <u>AND</u> 1 year FT* related experience in Early Childhood field <u>OR For Healthy Start Consultants only</u> - Master level degree in nursing, dietetics or other approved/related fields	Complete Introduction to Resources in Kentucky for Early Childhood Trainer's Complete Fundamentals of Effective Training (OR submit documentation of equivalent training)	Train at all training levels (1-5).	Renewable every three years by application, Remain updated on state & national early childhood issues. State updates available at websites.
SPECIALTY TRAINER	Current license, certificate, or credential & at least 3 years related experience in area of expertise in which topic is being trained		Special training ONLY in area of expertise; Training hours as required by the Licensed Child Care through an org ONLY in area of expertise	Renewable every three years by application, including proof of current license, certificate, or credential in area of expertise

Introduction to Resources in Kentucky for Early Care and Education Trainers

Introduction to Resources is required for all potential trainers, with the exception of Specialty Trainers. It provides an overview of the child care and early education systems in Kentucky and an introduction to the integration and articulation of training in the state. The overview includes, but is not limited to, types of child care in Kentucky; licensing and certification requirements for providers; agencies serving children and families; the KIDS NOW initiative; the STARS for KIDS NOW quality rating system; the Child Development Associate (CDA) Credential; and the Interdisciplinary Early Childhood Education (IECE)

certification process (2 clock hours). Introduction to Resources is provided through Child Care Resource and Referral agencies across the state (www.kentuckypartnership.org/ccrr/).

Fundamentals of Effective Training

Fundamentals of Effective Training (FET) is a Kentucky designed 15 hour seminar required for all potential trainers with the exception of Specialty and Level 1 Trainers (KAR 922 2:240, Section 10). Trainer's Credential candidates who have completed similar training in the previous 10 years may seek a waiver if the curriculum matches content and focus of the required seminar. FET includes, but is not limited to, principles of learning/barriers to learning; ethics and professionalism; needs assessment strategies; learning styles/cultural differences; designing and planning presentations; strategies for instruction; group dynamics and activities; creating and maintaining positive learning climates; and, effecting change in behavior. Acceptable equivalent training must cover areas included in FET (15 clock hours). FET is provided on a regular basis through the Training into Practice Project (TIPP) at the University of Kentucky (www.ihdi.uky.edu/tipp/).

Trainer Competencies

The competencies for a credentialed trainer include:

- ◆ adhering to training standards;
- ◆ demonstrating a thorough understanding of the principles of training adult learners as well as a knowledge of core content in early care, intervention and education;
- ◆ designing an effective environment for adult learning;
- ◆ demonstrating the ability to provide a variety of appropriate learning opportunities;
- ◆ analyzing training needs of participants;
- ◆ demonstrating the ability to plan and develop an appropriate training outline, as well as the ability to develop sequential training plans;
- ◆ demonstrating the ability to implement training techniques and strategies;
- ◆ selecting and incorporating appropriate reinforcement techniques for practical application; and
- ◆ designing evaluation strategies that are appropriate to the training delivered.

INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION

The Interdisciplinary Early Childhood Education (IECE) Certificate is the state's teacher licensure program that allows early care and education professionals to teach children from birth through self-contained kindergarten (regular and special education) in public school and early intervention settings. Programs that lead to the IECE certificate are offered through Kentucky colleges and universities and are available at the bachelor and graduate levels. Certification requires at least a bachelor degree and oversight is provided by the Kentucky Education Professional Standards Board (EPSB). Ten Teacher Standards for Preparation and Certification reflect performances expected of educators within a variety of environments, including classrooms, childcare settings, the children's homes, hospitals, or any other natural environments. Within these environments, instruction will include individual child activities, parent-child activities, and instruction in small and large groups. IECE educators are expected to be knowledgeable of developmentally appropriate and research-based practices in facilitating experiences for all children, including those with disabilities and from diverse populations. These standards include:

Standard I: Designs/Plans Instruction

Standard II: Creates/Maintains Environments

Standard III: Implements Instruction

Standard IV: Assesses & Communicates Learning Results

- Standard V:** Reflects/Evaluates Teaching/Learning
- Standard VI:** Collaborates with Colleagues/Families/Others
- Standard VII:** Engages in Professional Development
- Standard VIII:** Supports Families
- Standard IX:** Demonstrates Implementation of Technology
- Standard IX:** Provides Leadership Within School/Community/Profession

For more information about the IECE, contact the Kentucky Department of Education or Professional Standards Board at: <http://www.kyepsb.net/teacherprep/iecestandards.asp>.

TRAINING

Prior to implementation of the KY Early Childhood PD Framework, the system of training for early childhood professionals in Kentucky was a collection of workshops rather than a coordinated, comprehensive system. Child care licensing requires 15 hours of annual non-specified training (Type I and II), 9 hours for certified providers and a 6-hour mandatory initial Orientation curriculum, regardless of an individual's education or experience level. For the Kentucky Preschool Program, classified lead teachers (hired before 2004) are required to have 18 clock hours of training and certified lead teachers are required to have 4 days of professional development per year.

One of the major components of a professional development system is the acquisition of knowledge through education. There are a number of approaches that can be used to support education. These include (but may not be limited to):

- ◆ Training sessions offered at workshops, conferences, institutes
- ◆ Formal coursework
- ◆ Independent studies
- ◆ Distance education, such as webinars, online modules, conference calls, web-based courses/modules, web-based meetings, etc.
- ◆ Study groups
- ◆ Communities of practice/learning; networking

The current Kentucky Early Childhood Professional Development Framework provides specific recommendations on how education, training and credentials can be structured to support high quality practices across the early care, intervention and education system. A key characteristic of training and education within a professional development framework is that it typically involves learning experiences in contrived settings. During training, participants are often offered opportunities to practice skills through activities such as role playing, simulations, case studies and scenarios, critiquing videos, etc.

What is Training?

Training includes structured learning experiences designed to help the learner gain knowledge and /or skills that will increase the implementation of high quality practices.

The definition of high quality training being:

- ◆ Delivered by a trainer who has thorough content knowledge and understands the needs of adult learners;
- ◆ Based on needs assessment of what potential participants value and need to improve services;

- ◆ Matched to the learner's previous knowledge base and experience;
- ◆ Culturally sensitive;
- ◆ Focused on achievement-based outcomes or what participants expect to happen as a result of the training; and
- ◆ Involves the use of evidence-based practice and recommended standards in both content and approach.

LEVELS OF TRAINING

The following five training levels describe the knowledge base that trainees are assumed to have as well as the content for each level of training. The levels correspond to the trainer levels, EC Core Content and articulation plans. The training levels serve as a tool for the trainer and others who are planning workshops, institutes and conferences and to training participants when selecting training.

Level 1. Participants have limited knowledge and experience in early childhood education. Training focuses on basic concepts, philosophy and vocabulary in EC Core Content areas and related needs of the learner. Participants will be able to tie these to concrete examples and do introductory work in basic skills. Evaluation will show increased knowledge.

Level 2. Participants may have a Child Development Associate (CDA) Credential and two years of experience. They have basic knowledge and experience in early childhood education. Training focuses on EC Core Content areas and early childhood standards, including essential concepts, theory, philosophy and an extended vocabulary. Participants will be able to show that they understand how to apply concepts and skills, giving examples and details. They will also demonstrate the basic use of critical skills. Evaluation will show some measurable skills and increased knowledge.

Level 3. Participants may have an associate degree in field of early childhood education, three years of experience, and already have competence in curriculum planning. Training focuses on EC Core Content areas and early childhood standards, deepening to include related concepts, theories, philosophies, and vocabulary. Training begins to address teacher performance standards. Participants will be able to show general knowledge and critical skills as well as to demonstrate interpersonal communication skills. Evaluation will show several measurable skills and increased knowledge.

Level 4. Participants have at least a four-year degree in early childhood education or a related field plus two years of experience. They already have competence in the area and are working toward expansion and refinement of their knowledge and critical skills. Training focuses on EC Core Content areas or related areas, identified needs and early childhood and teacher performance standards. Training continues to expand knowledge and vocabulary and includes basic research. Participants will be able to show broad knowledge of content areas; effective application of vocabulary, concepts and skills; effective interpersonal communication skills with supporting examples and sufficient detail; and broad use of skills in content areas. Evaluation will show many skills or new knowledge and may include ongoing self-study.

Level 5. Participants have a four-year degree in early childhood education and advanced study plus four years experience including the supervision or teaching of others. Participants have competence in content areas and are working toward extensive refinements and critical thinking skills. Training includes more advanced research. Participants will be able to show effective, insightful use of supporting examples and/or relevant details with extensive use of critical skills. They will also be able to evaluate and synthesize information and make general applications. Evaluation will show multiple skills or new knowledge and may include ongoing self-study.

Table 4. Overview of Training Levels

Training Levels	Level 1	Level 2	Level 3	Level 4	Level 5
Description of training level	Develop basic knowledge <i>(assuming knowledge & experience are at or below Commonwealth Child Care Credential)</i>	Develop skills <i>(assuming basic knowledge & experience at level of CDA plus two or 3 years experience)</i>	Expand ability to develop curriculum <i>(assuming competence in curriculum planning at level of associate degree plus 3 years experience)</i>	Master skills for achieving identified goals <i>(assuming competence in content area at level of bachelor's degree plus two years experience)</i>	Modify skills for more effective application <i>(assuming competence at level of bachelor's degree plus advanced study & 4 years experience, including supervision &/or teaching)</i>
Training objectives	EC Core Content & related learner needs	EC Core Content, standards & related learner needs	EC Core Content, standards & teacher performance	EC Core Content, teacher & program standards	EC Core Content & teacher/leadership standards
Training focus	Basic concepts, philosophy & vocabulary	Essential concepts, theory, philosophy & extended vocabulary	Related concepts, theories & philosophies & further expanded vocabulary	Basic research in addition to expanded vocabulary, concepts, theory & philosophy	More advanced research building on learner's knowledge of EC Core Content
Demonstration of knowledge & skills	Can give concrete examples of basic vocabulary & concepts, demonstrate basic skills	Can correctly apply concepts & critical skills, giving examples & details	Can show interpersonal communication skills related to content as well as knowledge of content & other critical skills	Can effectively apply vocabulary, knowledge, concepts & skills to content; can show effective interpersonal communication skills with supporting examples, sufficient detail & broad use of skills	Can show extensive, consistent & effective application of skills to address issues & solve problems; integrate & expand concepts; use supporting examples &/or relevant details with critical skills; evaluate & synthesize information & make general applications
Evaluation	Finds increased knowledge	Finds some measurable skills & increased knowledge	Finds several measurable skills & increased knowledge	Finds many skills or new knowledge (through evaluation & ongoing self-study)	Finds multiple skills or new knowledge (through evaluation & ongoing self-study)

KENTUCKY STANDARDS OF TRAINING FOR EARLY CHILDHOOD PROFESSIONALS

In order to provide high quality training in early childhood care, intervention and education in Kentucky, standards in planning sessions and programs of study should be followed. Early care, intervention and education professionals seek and receive training in a variety of formats including workshops, programs of study resulting in a credential, and college and university offerings. For each training and education format, the trainer may use the following objectives to guide and plan his/her work.

Standard I: Promotes Professionalism

Promotes professionalism in the early childhood field by:

- ◆ Applying knowledge, skills and processes acquired through professional development to the instruction techniques.
- ◆ Aiding the early care, intervention and education professional to establish priorities for professional growth through a joint analysis of the participant's performance.
- ◆ Encouraging participation in professional organizations and activities.

Standard II: Demonstrates Knowledge of Content

Demonstrates knowledge of EC Core Content areas in Early Childhood Care and Education by:

- ◆ Relating knowledge in the trainer's area of expertise to the adult learners' ability levels.
- ◆ Integrating content knowledge to real world applications and current issues.

Standard III: Designs/Plans Instruction

Understands and develops sequential training plans by:

- ◆ Providing instruction that enables providers to apply knowledge and skills to make positive changes in the work environment.
- ◆ Creating learning experiences that actively involve the learner with hands-on activities whenever feasible; solely watching videos without follow-up activities does not constitute best practices for delivering quality instruction.

Standard IV: Creates/Maintains Learning Climate

Demonstrates ability to plan and develop appropriate training outline by:

- ◆ Showing flexibility and creativity in developing training methods and procedures.
- ◆ Using and organizing multimedia resources.
- ◆ Organizing materials in a logical and sequential manner.

Standard V: Implements/Manages Instruction

Demonstrates ability to provide a variety of appropriate learning opportunities for adult learners by:

- ◆ Considering various learning styles, cultural differences and barriers to learning.
- ◆ Using and developing multiple learning/teaching strategies that are appropriate to participants' learning levels.

Standard VI: Assess and Communicates Learning

Evaluates training effectiveness through feedback received by:

- ◆ Assessing knowledge gained, attitudes changed and/or skills obtained through appropriate methods (Examples: Pre and post-tests, end- of -session evaluations, hands-on activities, etc.).

- ◆ Making appropriate changes to instruction based upon feedback and assessment results.

Standard VII: Collaborates with Colleagues/Parents/ Others

Analyzes training needs of the community by:

- ◆ Inviting colleagues, parents, community representatives, and others to help design and implement collaborative instructional projects.
- ◆ Utilizing collaboration to create situations that enhance participants' learning.
- ◆ Recognizing differing viewpoints.

KENTUCKY DEPARTMENT OF EDUCATION PD STANDARDS

For programs administered through the Kentucky Department of Education, professional development is considered high quality when it meets the definition of professional development in 704 KAR 3:035 – Section 1(1) and Section 4(2) and all of the Kentucky Department of Education Professional Development Standards which are consistent with the federal criteria in Section 9101 of No Child Left Behind. Schools and districts will determine if the professional development for teachers, administrators and other school staff meets the following definition and standards for high quality professional development. All standards need to be applied in the context of the audience for professional development (PD) to qualify as high quality PD. The Department of Education recognizes that the extent to which professional development meets each standard may vary.

Standard 1: Professional Development is aligned with:

- ◆ local school and district goals and priorities as reflected in the school or district improvement plan or individual professional growth plans;
- ◆ Kentucky's Standards and Indicators for School Improvement; and
- ◆ Kentucky New or Experienced Teacher Standards or Interstate School Leaders Licensure Consortium Standards, or other professional/job standards.

Standard 2: Professional Development is a continuous process of learning through consciously constructed relevant job-embedded experiences so that professional development experiences and professional learning are integrated in the day-to-day work of teachers, administrators, and others to support improved practices, effectiveness and the application of skills, processes, and content.

- ◆ *PD is sustained, intensive, classroom-focused and is on in order to have a positive and lasting impact on classroom instruction, the teacher's performance in the classroom, and increased student performance; and*
- ◆ *PD is not one-day or short-term workshops or conferences unless they are a component of an intentionally designed comprehensive professional development plan based on teacher needs and student needs.*

Standard 3: Professional Development focuses on the knowledge and skills teachers, principals, administrators, and other school and district staff are to know and to do in support of student learning and students' well being. Professional development is based on what students need to know and be able to do in order to meet Kentucky's challenging content standards and student performance standards. Student content, performance and opportunity to learn standards are the core of professional development.

Standard 4: Professional Development actively engages teachers, principals, administrators, and others in learning experiences that advance their understanding and application of research based instructional practices and skills that reduce barriers to learning, close achievement gaps, and improve student

Standard 5: Professional Development prepares teachers, administrators, school council members and others in the school community as instructional leaders and collaborative partners in improving student performance (e.g., instructional leadership, organizational direction, collaborative decision making, analysis and use of data, planning, community partnerships, and creating a learning culture).

Standard 6: Professional Development is data and results driven focused on increasing teachers, administrators, and others' effectiveness in improving student performance and is continuously evaluated to improve the quality and impact of professional development.

Standard 7: Professional Development fosters an effective ongoing learning community that supports a culture and climate conducive to performance excellence.

Standard 8: Professional Development is culturally responsive and facilitates removing barriers to learning in an effort to meet each student's needs.

Standard 9: Professional Development is planned collaboratively (e.g., teachers and principals) and organized to maximize the collaborative use of all available resources to support high student and staff performance.

Standard 10: Professional Development fosters a comprehensive, long-range change process that communicates clear purpose, direction, and strategies to support teaching and learning.

Standard 11: Professional development is grounded in the critical attributes of adult pedagogy .

STATE TRAINING ORGANIZATIONS AND SERVICES

There are four major regional organizations that provide training and TA services to early care, intervention and education professionals across the state.

Child Care Resource and Referral Agencies (CCR&R). Nine CCR&R agencies, funded through the Cabinet for Health and Family Services, Division of Child Care, coordinate and support early care and education providers in accessing training and/or professional development opportunities. More information about CCR&R services can be found at: www.kentuckypartnership.org/ccrr/

First Steps Regionally Based Technical Assistance Teams (TATs). Seven university-based TATs, funded through the Cabinet for Health and Family Services, Department of Public Health, Early Childhood Development Branch, have staff available across the state to offer technical assistance and training to early intervention providers serving children birth to three with disabilities through the First Steps program. TATs provide support related to programmatic issues such as regulations, policies and procedures, best practices, and billing, as well as train new providers and assist them throughout the enrollment process to become First Steps providers. More information about First Steps TATs can be found at: <http://chfs.ky.gov/dph/firstSteps/helpfulstaff.htm>.

Early Childhood Regional Training Centers (RTC). Five Early Childhood Regional Training Centers, funded through the Kentucky Department of Education, Division of Early Childhood Development, have staff available across the state to offer technical assistance and training to public preschool teachers and staff. RTC staff offer regional trainings/workshops, on-site consultations, lending libraries of materials, annual statewide and regional collaborative institutes. More information about RTCs can be found at: <http://www.kde.state.ky.us>.

Healthy Start In Child Care Consultants. Healthy Start in Child Care, funded through the Cabinet for Health and Family Services, Division of Early Childhood Services, provides education and technical assistance to child care providers across the state in order to promote a healthy and safe environment for young children in out-of-home settings. Education is provided to address the health, safety, nutrition and social /emotional needs of young children. Healthy Start consultants are available through local

health departments on a regional basis to provide services to all counties. More information about Healthy Start in Child Care can be found at: <http://chfs.ky.gov/dph/ach/ecd/healthystart.htm>.

TECHNICAL ASSISTANCE

A key component of a professional development system is the provision of support services or technical assistance to help staff implement and sustain skills and practices in the work environment. The provision of TA and support requires collaborative relationships. At a minimum, collaboration is required between the TA provider and the TA recipient. In addition, there may be times when collaboration between agencies that provide TA is required to adequately and effectively meet the TA recipient's needs. Such collaborative relationships are encouraged and must be thought about ahead of time to ensure that respect, confidentiality, and mutually agreed upon goals are all part of the collaborative relationship.

What is Technical Assistance? *Technical Assistance is a collaborative, relationship-based model of assistance and support designed to:*

- *Identify, select, or design evidence-based solutions to address problems, needs or goals,*
- *Adopt or adapt knowledge to practice, and*
- *Effectively implement solutions customized to meet the needs of clients.*

There are a number of approaches that can be used for providing technical assistance and support. These include (but may not be limited to) the following.

- ◆ Sharing information and resources
- ◆ Modeling
- ◆ Mentoring
- ◆ Coaching
- ◆ Structured Consultation
- ◆ Communities of Practice/Learners
- ◆ Internships

There are a variety of delivery methods that can be used to provide TA. These consist of both off-site and on-site methods and include (but may not be limited to) the following.

- ◆ Telephone
- ◆ E-mail
- ◆ Discussion Boards
- ◆ Fax
- ◆ Video-Conferencing
- ◆ Program Visits

Effective technical assistance and support includes the following characteristics. First, the TA recipient must have a base of knowledge related to the practice. Support in implementing the practice or skill will not be effective without this base knowledge. Second, the TA recipient must be allowed to demonstrate

knowledge and skills in a natural work setting or be able to produce what was learned. Support may involve demonstration of a skill by a technical assistance specialist, with the TA recipient then being able to reproduce that skill.

TA PROVIDER COMPETENCIES/SKILLS

Similar to trainers, those providing technical assistance and support need specific skills in order to implement TA effectively. The skills and competencies can be organized into three major areas.

Establishing and Maintaining a Relationship with the Client

1. Build supportive, positive, and trusting relationships with clients/staff/programs.
2. Recognize the client as an integral participant/partner in identifying needs and developing an action plan to address those needs.

Content Knowledge

1. Maintain knowledge of trends and most current research and evidence-based practices in area of expertise.
2. Apply evidence based knowledge and skills, based on the specific needs of the TA recipient.

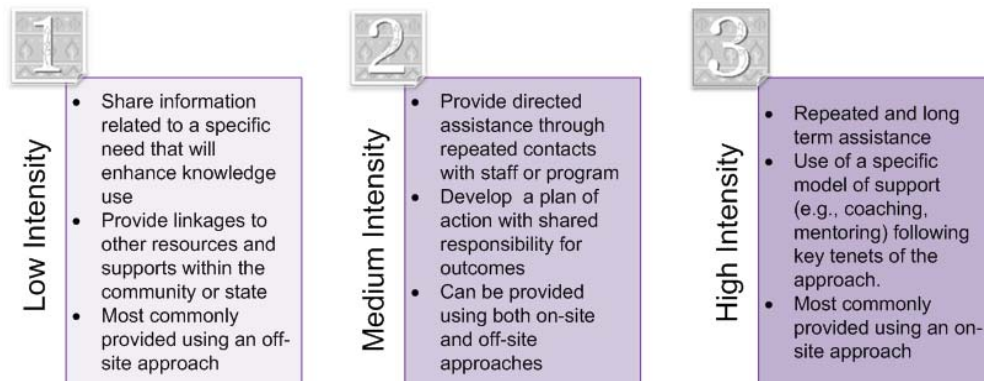

Implementing Effective Technical Assistance Practices

1. Utilize and demonstrate expertise in applying evidence based technical assistance practices applicable to client needs.
2. Maintain confidentiality throughout the TA process.
3. Demonstrate flexibility and a positive attitude in delivering assistance to meet the challenges and changing needs of the client.
4. Use observation strategies and appropriate tools to objectively observe client/program to determine prescriptive changes needed.
5. Document TA activities and outcomes.
6. Develop and embed new knowledge and skills to build staff/program capacity.
7. Provide services and follow-up in a timely and efficient manner.

CONTINUUM OF TA SERVICES: MATCHING LEVEL TO NEED & OUTCOME

TA activities should be conducted, recorded, and reported consistently. In addition, it is important that the intensity of the TA provided be matched to the level of need and the outcomes that have been identified by the TA recipient. Therefore, the level and intensity of TA may vary from low (brief encounters) to high (intense on-site support over time), with the intent to provide support to staff in effectively implementing a practice or set of practices. When providing support, it is important to remember that TA should be aligned with education and/or training to support the transfer of knowledge and/or skills into the work environment. This means that further areas for education and training may be identified as part of the TA process.

Figure 3. Level and Intensity of TA

MEASURING AND EVALUATING THE IMPACT OF TECHNICAL ASSISTANCE AND SUPPORT

Just as it is important to evaluate the effectiveness of training, it is also critical to evaluate technical assistance. By developing a plan to measure the impact and effectiveness of the TA and support provided and implementing that plan, the TA provider will obtain valuable information to direct future efforts. The key components of this evaluation process are addressed below.

Critical Levels of Evaluation

In keeping with the levels of evaluation outlined in the Fundamentals of Effective Training (FET) curriculum for credentialed trainers, four levels of evaluation are important to consider when designing TA evaluation.

1. Obtaining the **TA recipient's reactions** to the TA and support involves allowing the TA recipient to evaluate TA immediately following receipt of assistance. Determining the information desired and developing a written comment sheet that can be submitted anonymously allows the TA recipient to provide honest reactions to the assistance received.
2. Evaluating the **TA recipient's learning** may mean conducting a before and after measurement of knowledge and/or skills identified as needing improvement.
3. Measuring the **TA recipient's change in behavior** involves determining if the desired skill has been implemented and maintained over time. A follow-up appraisal may be required at some agreed upon time in the future to determine if the TA recipient is continuing to utilize the new knowledge and/or skill.
4. Determining the **results** of the TA and support identifies the impact that the acquisition and implementation of new knowledge and/or skills has on both the quality of the early care, intervention and education environment and ultimately on children and/or families served. For instance, improvement in utilization of proper diapering techniques may result in decreased instances of gastrointestinal illnesses in a classroom.

TA Provider Self-Reflection

Self-reflection on the part of the TA provider is important for continuous quality improvement. Considering the relationship with the TA recipient and how this relationship impacted his/her receptiveness to support, the opportunities available to practice new skills, and future opportunities and approaches that may be helpful are all important aspects of reflection. Additionally, it is important to include in the evaluation plan some concept of how information obtained from evaluation methods will be utilized to improve the provision of TA and support.

Link to the TA Recipient's Goals and Outcomes

As discussed previously, the TA provider and recipient should establish specific client goals and outcomes for the TA provision. Therefore, mechanisms should be put into place collaboratively between the TA provider and recipient to formally measure the degree to which the assistance and support aided in meeting those identified goals and outcomes.

ARTICULATION

Articulation is the process by which students or trainees transfer credits for course work from one training session or academic institution to another. In the past, barriers to articulation in the field of early childhood education in Kentucky have hindered the development of a seamless system of professional development. The PD Framework includes a process which meshes the system for credentialing and training of early childhood professionals. It includes five levels of competency, each of which articulate into the next level. At lower levels of competency, the completion of a particular credential, program or certificate equivocates, or transfers, as college credit. Thus, students can transfer their training hours between secondary schools, community and technical colleges, training programs, and four-year institutions. The academic credits are transferable to an Interdisciplinary Early Childhood Education program and count toward IECE degree credit hours.

Individual higher education institutions will ensure that students hold the requisite levels of competency for each credential or certificate earned. Course titles or course numbers are not required to be identical across academic institutions or training entities.

ARTICULATION LEVELS

Level 1 (CCCC). Individuals must:

- ◆ Meet requirements for the Commonwealth Child Care Credential, which include 60 clock hours of training, including field-based assignments **OR**
- ◆ Complete an advanced program at a secondary school (i.e., high school or vocational school), Discover College (an alliance of high schools and community and technical colleges in Daviess County which offers training for college credit) or similar institution.

The EC Core Content competencies at Level 1 should be met with either option. An exit assessment is required for either option. The assessment is the responsibility of the institution that is providing the program. Each option earns 3 hours of college credit, and each transfers to Level 2.

Level 2 (CDA). Individuals must:

- ◆ Meet the requirements for the Child Development Associate Credential (CDA) as verified by the Council for Early Childhood Professional Recognition in Washington, D.C., including 120 clock hours of training.
- ◆ CDA recipients meet minimum EC Core Content competencies at Level 2. A candidate continuing in an Interdisciplinary Early Childhood Education degree program can expect to meet all EC Core Content competencies at Level 2. The credential transfers as a minimum of 6 semester hours of college credit to Level 3A.

Level 3A (Post-Secondary Certificate). Individuals must:

- ◆ Complete 18 to 21 semester hours in IECE content (which can include relevant secondary school or CDA credit) plus 12 to 15 semester hours in general education. A certificate of completion can be earned at a technical college, community college or 4-year college or university. Training must

include practicum and field experience, and the recipient must demonstrate increasing levels of competency identified for IECE teacher performance standards at Level III, as well as the ability to integrate and apply content. This certificate transfers to Level 3B.

Level 3B (Associate's Degree). Individuals must:

- ◆ Complete an additional 12 to 15 semester hours in IECE content plus an additional 15 to 18 semester hours in general education, resulting in an associate degree. The degree can be earned at a technical college, community college or 4-year college or university. Training must include practicum and field experience, and the recipient must demonstrate increasing levels of competency identified for IECE teacher performance standards at Level III, as well as the ability to integrate and apply content. The EC Core Content at Level 3 can be met at the completion of the associate degree. All training transfers to Level 4 and can be articulated with 4-year-degree programs in IECE.

Level 4 (Baccalaureate Degree). Individuals must:

- ◆ Complete an additional 60 to 64 semester hours in IECE content and meet the other requirements of the degree-granting institution to receive a bachelor's degree. The course work must include field experiences, practicum and/or student teaching. Recipients must demonstrate the high level of competency identified for IECE performance standards and an increased ability to integrate and apply content, as well as to generate strategies for improving the performance of self and children. The EC Core Content competencies at Level 4 should be met at the completion of the bachelor's degree.

Level 5 (Masters Degree). Individuals must:

- ◆ Meet requirements for a master's degree to obtain initial teaching certification or to complete advanced studies. Course work for the degree must include field experiences, practicum, student teaching and/or internship. Recipients must demonstrate the highest level of competency identified for IECE teacher performance standards and a high level of ability to synthesize, integrate and apply content. The EC Core Content competencies at Level 5 will be met at the completion of the master's degree.

Table 5. Articulation Levels and Requirements

Articulation Levels	Level 1	Level 2	Level 3A	Level 3B	Level 4	Level 5
Requirements	Obtain Commonwealth Child Care Credential or complete advanced program at secondary school, Discover College or similar institution	Obtain CDA & meet minimum level of competencies for all IECE teacher performance standards for Level 2	Obtain CDA including 18 to 21 college credit hours in IECE content plus 12 to 15 college credit hours in general education	Obtain associate's degree including 12 to 15 college credit hours in IECE content, 15 to 18 hours in general education & field experience	Obtain bachelor's degree including additional 60 to 64 hours in IECE content & field experience	Obtain master's degree, including field experience
Minimum	3 hours of	6 hours of	Credit hours	Credit hours		

Credits	college credit (either option) which transfer to Level 2	college credit which transfer to Level 3	transfer to Level 4	transfer to Level 4 & will be articulated with 4-year bachelor's program in IECE

SCHOLARSHIPS

KIDS NOW Early Childhood Development Scholarships are available for early care and education professionals. Recruitment of potential scholars, assistance with enrollment and award procedures, and dissemination of training and education information is facilitated by a Professional Development Counselor located in Kentucky Community and Technical Colleges sites across the state. A list of the PD Counselors is available at www.kentuckypartnership.org. The role of the Professional Development Counselor is to support the scholar in the successful completion of a planned program of study and to assist the scholar in the planning and implementation of a Professional Growth Plan specific to the individual's goals and needs. The Professional Development Counselor facilitates the application processes for the Related Expenses and Milestone Achievement Awards.

The Early Childhood Development Scholarships to obtain college credits are administered by the Kentucky Higher Education Assistance Authority (KHEAA). The Early Childhood Development Scholarships to obtain the Commonwealth Child Care Credential and Child Development Associates Credentials outside a higher education institution are administered by the Division of Child Care.

All scholarships are awarded based on the availability of funds and on the adherence of the scholar to eligibility guidelines for the Early Childhood Development Scholarship and on the eligibility requirements of the specific training or education program in which the candidate is enrolled.

KIDS NOW EARL CHILDHOOD DEVELOPMENT COLLEGE SCHOLARSHIPS & AWARDS

These KHEAA-administered scholarships are for early care and education professionals who will take college-credit courses to obtain the Child Development Associate's Credential, associate or bachelor's degrees in early childhood development, or the Director's Credential. The scholarships may be used at Kentucky colleges and universities approved by the Early Childhood Development Authority. After courses are successfully completed, the scholar may apply to be reimbursed for related expenses at the amount specified by the Early Childhood Development Authority.

In addition, eligible applicants for scholarships must be employed at least 20 hours per week in a participating early childhood facility *or* provide training at least 12 times a year in early childhood development *or* be employed as an preschool associate teacher (teacher assistant or paraprofessional) in a state-funded preschool program; *and*

- ◆ Be enrolled in a maximum of nine credit hours per academic term in an approved program; or
- ◆ Be enrolled in an approved CCCC or CDA program; and commit to further service (ranging from working an additional 6 months to an additional year) in the center supporting the training.

The scholar also may be eligible for a Milestone Achievement Award on receipt of the credential or degree; 90 percent of the award is paid by the state, and 10 percent by the employer.

DIVISION OF CHILD CARE NON-COLLEGE SCHOLARSHIPS, AWARDS, GRANTS

The Division of Child Care offers a non-college scholarships and awards, as well as grants to support improved quality in early care and education settings, each of which is described below.

Non-College Scholarship Program

The Commonwealth Child Care Credential /Child Development Associate Scholarship Program is administered by the Cabinet for Health and Family Services, Department of Community Based Services, Division of Child Care. The program provides financial assistance to the extent funds are available, in the form of scholarships for those seeking the Commonwealth Child Care Credential (CCCC) and the Child Development Associate (CDA) Credential. Scholars must complete all CCCC and CDA training within a 24-month period.

Training programs for the CCCC (60 clock hours) and CDA (120 clock hours) are available through training organizations approved by the Division of Child Care. Scholarships are available for this training. In addition, employers must commit to paying for book expenses up to \$50 for Term 1 (first 60 clock hours) and for Term 2 (second 60 clock hours).

Eligible applicants for scholarships must be employed at least 20 hours per week in a participating early childhood facility or employed as an associate teacher in the state-funded preschool program and commit to continue employment for six (6) months at the participating early childhood facility upon obtaining the Child Development Associate (CDA); or one (1) year upon obtaining an Early Childhood Associate Degree or the Kentucky Early Childhood Development Director's Credential, paid for in part by a scholarship; or six (6) months at a participating early childhood facility and one (1) additional year at an early childhood facility located in Kentucky upon obtaining the early childhood credential or a baccalaureate degree, paid for in part by a scholarship.

Awards

Milestone Achievement and Related Educational Reimbursement Awards. Milestone Achievement Award is a monetary award paid to early care and education professionals participating in the KIDS NOW non-college and/or college scholarship program(s) upon completion of an Early Care and Education credential or degree. Ninety percent of the award is paid by the state, and 10 percent is paid by the employer. The Related Educational Reimbursement Expense is a monetary award paid to early care and education professionals participating in the KIDS NOW college scholarship program upon successful completion of a scholarship semester/term. Only scholars enrolled in a college or university (KHEAA) scholarship program are eligible to receive a Related Educational Expense Award. Non-college scholars are not eligible.

Grants

Child Development Associate's Credential (CDA) and Child Development Associate's Credential (CDA-K) Mini Grant:

Mini-grants for the assessment fee for the Child Development Associate's Credential are available regardless of whether the CDA is obtained through college credit or non-college-credit courses. The Division of Child Care administers these grants. Candidates can apply through their local PD Counselor.

Recipients awarded a CDA (Child Development Associate) or CDA-K (Child Development Associate KIDS NOW) Mini-Grant have the \$325.00 Direct Assessment Fee paid to the Council for Professional Recognition on their behalf. All CDA candidates must meet eligibility guidelines. The regular CDA Mini-Grant is available to individuals working in settings that include infant toddler and preschool classrooms, family child care homes, and those serving as home visitors. CDA-K Mini-Grants are available only to CDA-K recipients.

National Association for the Education of Young Children (NAEYC) Mini-Grant:

Child Care programs receiving a NAEYC Mini-Grant have the On-Site Validation fee paid to the National Association for the Education of Young Children (NAEYC) on the program's behalf. Candidates must meet eligibility guidelines. The On-Site fee is based on program level. The NAEYC Mini-Grant is available to Kentucky Licensed Type I Centers. An applicant must request the DCC-207 NAEYC Mini-Grant Application from their local PD Counselor.

National Association for Family Child Care (NAFCC) Mini-Grant: The NAFCC Mini-Grant pays up to \$495.00 for the 2-part Accreditation fee, (\$247.50 Application fee and \$247.50 Observation fee) to the National Association for Family Child Care (NAFCC) on behalf of eligible candidates. The NAFCC Mini-Grant is available to Kentucky Certified Family Child Care Homes and Licensed Type II Homes. An applicant must request the DCC-206 NAFCC Mini-Grant Application from their local PD Counselor.

KENTUCKY DEPARTMENT OF EDUCATION TRAINEESHIP SCHOLARSHIP

The Kentucky Department of Education provides special education scholarships that can be used for teachers pursuing the IECE certification in state-funded preschool programs. The Traineeship scholarships are available for lead teachers in the public school preschool program or preschool/Head Start blended programs who hold a bachelor's degree but not an IECE certification. The funds pay for up to 90% of tuition for up to six college credit for four consecutive semesters. Additional information is available at: <http://traineeship.nku.edu>.

Table 6. Kentucky Credentials and Degrees Scholarship Supports

	CCCC (60 clock hours)* Contract ed Instructi on	CDA* (GED Prerequisite) Contracted Instruction	Funda- mentals of Effective Training (FET)*	CDA (GED Prerequisite) College Credit Program*	ASSOCIATE DEGREE OR TECHNICAL COLLEGE PROGRAM*	Bachelor's Degree*	Director's Credential* (2- or 4-year College)

EARLY CHILDHOOD TRAINING REGISTRY SYSTEMS

There are two major training registries systems used by early care, intervention and education professions in Kentucky: The Early Care and Education Training Records Information System (ECE-TRIS) and TrainingFinder Real-time Affiliate Integrated Network (TRAIN).

EARLY CARE AND EDUCATION TRAINING RECORDS INFORMATION SYSTEM (ECE-TRIS)

ECE-TRIS was developed to provide a centralized database to track and store individual training records for early care and education professionals in Kentucky. ECE-TRIS is maintained through Eastern Kentucky University (EKU) and use of the system is free to child care providers.

ECE-TRIS supports early care and education providers in meeting the regulatory requirement for Training Maintenance of Records (922 KAR 2:240 Section 16) by providing an easily accessible, centralized location for training records. ECE-TRIS information is made available to the Cabinet for Health and Family Services upon request. Training Information forms, Training Cover Pages, Registration forms and contact information can be found on the ECE-TRIS website <http://tris.eku.edu/ece>.

Creating and Accessing Records

Early Care and Education professionals can access, view and/or print their training records at any time. ECE-TRIS documents training for Licensed, Certified or Registered early care and education providers as well as programs participating in the STARS for KIDS NOW program. ECE-TRIS records also will assist individuals with professional development planning.

Information on individual Early Care and Education Professionals (training attendees) is collected via a Participant Form that is distributed at training sessions by credentialed trainers. Training data are entered by staff at established training agencies and/or by ECE-TRIS staff.

The ECE-TRIS program is designed to support program directors as they work with staff to develop professional development plans and verify that staff has met training requirements such as those for Licensing, Certification, and STARS for KIDS NOW, as well as the Commonwealth Child Care Credential or Trainer Credential renewals.

TRAININGFINDER REAL-TIME AFFILIATE INTEGRATED NETWORK (TRAIN)

Train, a project of the Public Health Foundation with funding from The Robert Wood Johnson Foundation, participating states and the Centers for Disease Control and Prevention, is an on-line training management system for registration and record keeping of the training session offered through First Steps to early intervention providers across the state. The Kentucky site is managed through the Department of Public Health. TRAIN is designed to serve the majority of the U.S. public health workforce. TRAIN can be accessed at www.train.org.

Creating and Accessing Records

Early Intervention providers can register as a TRAIN user and then use TRAIN to search for on-site or distance learning courses, create a personal learning record of competency-based training, and register online for training sessions and courses.
